

Are you a '1' or a '0'?

You will be digitized and you will enjoy it. Peasant.

Perhaps the best question we all need to ask ourselves in times of late is this:

“Are you a 1, or a 0?”

A ‘1’, in my mind, equates to one who *knows* themselves or, at least, aspires to, through learning and knowledge acquisition. ‘1’ who *knows* of inalienable rights to existence and freedom of being. ‘1’ who knows history, especially the tales of humanity. ‘1’ who connects to the ‘real’ world, in, and around them.

A ‘0’, in my mind, equates to ‘1’ who forget they are a ‘1’ and in doing so, switched to a ‘0’. By the way, also in my mind, a ‘0’ can always revert to a ‘1’.

Check this site out. You may not be aware yet, but the [Known Traveler Digital Identity](#) program which is a partnership with the World Economic Forum (WEF) - a **non-Canadian** privately-funded lobbying organization¹ - is morphing into something called the Federal Identity Program to invoke the following strategy to stretch out over 2022-2025 in Canada:

Our strategy: transitioning to a more digital government to improve client service.

“The COVID-19 pandemic highlighted the need for government services to be accessible and flexible in the digital age. The next step in making services more convenient to access is a federal Digital Identity Program, integrated with pre-existing provincial platforms,” a report published by the government reads.²

And the brilliant [Catherine Austin Fitts](#) chimes in from the [Children’s Health Defense](#) with [Polly Tommey](#):

Let's say I want to mandate a vaccine. Your financial transaction ability can be turned off; your access to your financial assets can be denied or stopped if you don't do what you're told.

And I also had some words to say on the digitization of the human in my interview with the [Geopolitics and Empire podcast](#). You can skip to 44 minutes in to hear some focused words.

“One of these days, they’re going to tighten the noose in a way that *you’re* not going to like. You might be fine with it now, but what about when, not if, when, whether or not you get to buy food depends on your score. What if your score isn’t high enough because you did something that they didn’t like.” Which literally, could be *anything*.

I’m all for solutions. I love being able to contribute to the growth of my species, if I can, and the well-being of the planet. Of course, I think we all feel this way. But there is a right way (probably a few right ways) to do this. Digitization by private entities of every living human being, is **not** the way.

Please watch [this](#) as well. [Maajid Usman Nawaz](#) and [Joe Rogan](#) discuss the very serious problems associated with centralized, ‘government’-controlled digital currency.

Interesting take on the 1 or 0 question as I was guessing from the title that you were going to address how the technocrats view human beings—in other words, as a binary sequence of 1's and 0's (e.g., a barcode).

The noose quote reminds me of the opening lines from the first article I published at Substack way back in April 2021:

“The noose is dangling gently around our necks. Every day, they cinch it tighter. By the time we realize it's strangling us, it will be too late.” (margaretannaalice.substack.com/p/a-primer-for-the-propagandized)

This is one of the emails I received the other day. I get hundreds daily, and I am hearing you all.
This particular note spoke loudly to me and this lovely person gave me permission to share her words.
